Our Journey, Our way

#0xWorkflow

- Introduction

This document introduces our way in crafting softwares. It's our guidance and practice of doing. Essentially, it is established on four fundamentals: Understand; Do; Verify; Along-with. Finally: Manage, Governance.

- Services

1. **Analysis:** Requirements, Technical Specifications, Projects (Databases, Apps, User Journey) Diagrams,
2. **Programming:** Per the client's *request* and *budget*. We recommend the optimal and fitted solution. We provide:
 - a. IN-HOUSE: we will develop the project in-house. **Recommended for: Highly technical and Large projects.**
 - b. OUT-SOURCE: we will share the project with our trusted technical partners *in a technical language to fit the project requirements*. **Recommended for: Med projects, when the project has a lot of routine services but with extra new features.**
 - c. BUILD YOUR TECH TEAM: we will hire the talents per your needs, structure and stabilize the tech team, *grant & manage the whole process headache at optimal cost*. **Recommended For: Small companies, Startups.**
3. **Testing:** First impression is essential, usability and availability are critical. We do the needed tests to let the discontinuation never happen.
4. **Help:** FIX FIX FIX. REAL Technical support.
5. **Manage and supervise:** Software like babies, grow. We manage the software life. No matter who the developer was/is, the companies were/are, as long as it is under our eyes, we care. **Recommended For: Long-period projects.**

- Solutions

1. **Human Resources Solutions:** Thanks to our vast network of professionals, we provide the best technical competencies in specific specializations upon request. Contact us to request the solution¹.
2. **Financial Solutions:** We know that good technical projects require good financial liquidity. We accept payments in different and easy ways suited to the nature of the project. Contact us for more details.
3. **Technical Solutions:** To work on technical projects, you need an integrated chain of resources. We operate
 - a. [Areeb](#): 'Areeb' means skilled dexterous in Arabic. We connect you with the best of our considered competencies, and monitor the progress process².
 - b. [TechArt](#): The technical infrastructure for your project. Manage your technical business with an easy and simple interface.
 - c. Soon.

- Workflow

Phase	Description
Kickstart	Elaborative meetings with the client. Make sure that we understand the needs. A deposit is required.
Analysis	Start working on the service technical analysis. The service technical details, expected delivery date, and an initial full quote as the analysis results ³ .

¹ The solution doesn't include hiring, follow-up, or any other responsibilities.

² We follow-up and manage the relation to save the rights of all parties.

³ If the client continues, the deposit will be discounted from the initial quote. Otherwise, the deposit isn't refunded.

Apply	Hands-on. Implement the software, let it be real. Per your choice, we will keep you informed with progress reports.
